SASSO PIATTO, BOMBATO, CIOTOLI

Sassi di fiume dalle forme tondeggianti. I moduli per la posa vengono montati su rete in fibra attraverso uno schema irregolare per perdere, una volta posati, la matrice di base ed offrire un'immagine d'insieme esteticamente migliore.

Real river stones in round shape. The mosaic modules on a fibre net are specifically designed to loose the "tile look" after the installation. This irregular scheme allows the natural product to display a homogeneous rug surface to offer an esthetical whole look most similar to a riverbed.

Galets de rivière de forme arrondie, monté sur trame de fibre emboîtable.

Runde Formen und verschiedene Oberflächen für diese Flusskiesel, die laut einem unregelmässigen Schema auf Fibernetz geklebt werden, damit die Fugen nach der Verlegung nicht so sichtbar sind.

MARCIAPIEDI e PALLADIANE

Mosaici di marmi ed onice dalle forme irregolari e dalla superficie piatta, che vengono burattati per arrotondarne i bordi, poi montati su rete in fibra attraverso uno schema irregolare per offrire un'immagine d'insieme esteticamente migliore a modello "opus incertum" tipico delle famose ville venete del Palladio.

Natural mosaics in marble and onyx with irregular shape and flat surface, with blunted edges and assembled on fibre net . The mosaic modules on a fibre net are specifically designed to loose the "tile look" after the installation. This irregular scheme allows the natural product to display a homogeneous rug surface to fit the "opus incertum" model typical of the famous Palladio's venetian villas.

Mosaïques en marbre ou onyx de formes irrégulières et surface plane qui sont arrondis et adoucis dans les bords et montés sur trame de fibre emboîtables. Le calepinage de base offre une image globale esthétiquement meilleure selon le module 'opus incertum' typique des fameuses villas vénitienne du Palladio.

Unregelmässige Formen und platti Oberflächen für diese Marmor oder Onyx Mosaiken. Um die Borden abzurunden, werden die gebeult, und erst danach laut einem unregelmässigen Schema auf Fibernetz geklebt, damit die Fugen nach der Verlegung nicht so sichtbar sind, und ein schöneres im "opus incertum" Styl Gemeinsambild anzubieten, der typisch der berühmten venezianischen Villas von Palladio war.
